

The History of Change

OFFER OVERVIEW

Trek10's model-agnostic accelerator is a bespoke offering designed to streamline and expedite the deployment of your GenAI workloads. Leveraging our extensive experience in GenAI on AWS workloads and proven design patterns from previous engagements, the accelerator is structured with approximately 80% prebuilt components and approximately 20% customizable elements.

Reduce complexity, accelerate your time-to-market, and ensure a smooth and efficient launch!

WHAT IT IS

Trek10 works with you every step of the way to ensure you have full understanding and control over the behavior of the system and to create a model agnostic, GenAI workload/natural language engine.

Trek10 will use its deep GenAI knowledge to create a solution bespoke to their use case. This can include creating a natural language engine with context of a client's proprietary data.

ACCELERATOR PATHWAYS

Bedrock Accelerator

- Menu Ordering Natural Language Engine
- Customer Service & Support Natural Language Engine
- Natural Language Engines
- Image Generation
- Educational & Training Engines
- Content Creation
- Content Summarization
- Franchise Operations Manual
- Curriculum Builder
- Menu Teams

Q Business Accelerator

- Virtual Assistants
- Educational & Training Engines
- Content Creation
- Content Summarization
- Franchise Operations Manual
- Employee/Customer Loyalty Programs
- Curriculum Builder

MLOps/DataOps Accelerator

- Sentiment Analysis
- Translation
- Equipment Quality Scoring
- Food Quality Scoring

QuickSight Q Accelerator

- Report Generation
- Dashboard Generator
- Trend Analysis
- Inventory Forecasting

KEY FEATURES AND BENEFITS

Model-Agnostic Flexibility

Develop a natural language engine that is not tied to any specific AI model, providing the flexibility to choose the best model for your needs.

Expert Collaboration

Work hand-in-hand with Trek10's GenAI and AWS experts to ensure your solution meets both technical and business requirements.

Customizable Solutions

Gain full control over your natural language engine's behavior and capabilities, with approximately 20% customization tailored to your unique use case.

Advanced Tools

Harness the power of LangChain and AWS Bedrock for sophisticated AI capabilities.

Prebuilt Components

Utilize approximately 80% prebuilt elements based on proven design patterns from previous engagements, ensuring efficiency, reliability, and faster deployment.

Data Integration

Seamlessly incorporate your proprietary data in a secure fashion for context-aware responses.
