Amazon Q Accelerator to AWS

Trek10's Amazon Q GenAI Accelerator makes GenAI implementations predictable, fast, and a stress free migration. Trek10's accelerator leverages your existing data to make realizing initial value in GenAI happen in weeks, not long project timelines.

FULLY MANAGED PROCESS

Use-Case Planning
Our GenAI planning process defines resource requirements, maps dependencies between outcomes and data, prioritizes and orders efforts, and organizes sprints to estimate the duration of the project.

GenAI Security
We leverage Amazon Q's ability to tailor responses based on your employee's access to information, and integrate it into your identity provider, making employee onboarding and management seemless.

Rapid Implementation and Manage
AWS-certified specialists manage your implementation from planning to execution and post-implementation support.

Financial Incentives
We're here to help you access funding opportunities, where applicable, tailored to your specifications and AWS requirements.

EXCLUSIVE OFFERS TO OFFSET COST

Amazon Q Funding
AWS funding can cover your implementation costs. Partner with Trek10 for a fully managed implementation experience that builds value with GenAI.

AWS GenAI Funding
AWS funding can cover your larger scale customized GenAI costs. Partner with Trek10 for a fully managed custom GenAI implementation experience that seamlessly builds or transitions GenAI workloads to AWS.

Upskilling and Training
Benefit from included training, preparing your IT staff to manage your new AWS-native GenAI environment.

Optimize Operations
Leverage Trek10's consulting services for expert guidance in change management. Our fully managed cloud operations and staff augmentation helps to fill critical skills gaps and avoid transition disruptions.

WHY TREK10

- 12 AWS Competencies and Service Validations.

UP TO $25,000 FULLY-FUNDED AMAZON Q ACCELERATOR INCLUDES

Assessment and Planning

GenAI Security & Guardrails

Rapid Implementation of Amazon Q

Groundfloor Training on Amazon Q

*This offer applies only to implementations of Amazon Q and does not cover ongoing costs. Pricing is based on Trek10 implmentation costs less AWS funding, which is dependent on projected post-implementation spending on AWS. Implementation pricing is per project basis, not per use-case. Deliverables can include Amazon Q for Business, Amazon Q for Developer and Amazon Q for Quicksight. The access management and continued evaluation of model updates are the responsibility of the customer unless ongoing support from Trek10 CloudOps is maintained. Prices are subject to all applicable taxes. Some conditions and exclusions may apply. Fully-funded offer is subject to approval from AWS. Please contact Trek10 for full details.

Contract Trek10 for more details on how Amazon Q Acceleration can benefit your business.
